EDUCATION

Auburn University

Auburn, AL

B.S. in Computer Science & Mathematics; Minor in Business (BET); AI Certificate; GPA: 3.71

May 2027

- Relevant Coursework: Artificial Intelligence, Data Structures & Algorithms, Software Modeling, Discrete Mathematics, Digital Logic Circuits, Assembly Programming
- Involvement: Competitive Programming Team, Association for Computing Machinery (ACM), AXA fraternity

EXPERIENCE

OCV LLC

Oct 2025 – Present

Software Product Intern

Opelika, AL

- Collaborating with cross-functional engineering, product, and design teams to research user needs and prototype mobile app features supporting first responders' mental health and performance.
- Applying human-centered design principles and data-driven insights to inform feature prioritization and product roadmap decisions.

JupJewels.com

Jul 2025 – Sep 2025

Software Developer (Freelance)

Opelika, AL

- Developed a custom Shopify e-commerce platform using Liquid and JSON, implementing a DIY jewelry creation feature which became the best-selling product.
- Optimized rich search results, interactive features, and email automations, enhancing user engagement and conversion by 35% from the legacy website.

Kahua Inc.

May 2025 – Aug 2025

Software Developer Intern

Alpharetta, GA

- Expanded an automated QA testing framework by developing 17 new tests and 12 internal functions, improving code coverage and system reliability across the Azure-managed codebase.
- Increased team efficiency by 30% by engineering a debug tool that enabled hot reloading and eliminated the need for driver resets during runtime recompilation.

Auburn University – Samuel Ginn College of Engineering

Feb 2024 – Sep 2025

Undergraduate Research Assistant

Auburn, AL

- Fine-tuned open-source computer vision models for medical image classification, building and managing a 5K+ image dataset that improved diagnostic accuracy by 18%.
- Developed a Flutter-based mobile therapy app with a Firebase backend, integrating generative AI for clinician-approved feedback and implementing secure authentication, real-time sync, and cloud functions.

BWH Sports Camp

Jun 2021 – Dec 2024

Founder

Atlanta, GA

- Founded and scaled a youth sports program to 55+ campers and 6 staff, generating over \$100K in profit through community networking, marketing, automation tools, and digital registration systems.

PROJECTS

Email Bot | Python, Google Cloud, OpenAI API

Sep 2024

- Developed a cloud-based automation system that monitored the BWH Sports Camp inbox. Activated by a pub-sub, it generates an LLM response and sends formatted replies using a predefined knowledge base.

Social Platform | React.js, Node.js, SQL, WebSockets

Aug 2024

- Built a full-stack messaging and content-sharing platform featuring a RESTful API, WebSocket live server, and responsive React front end for real-time communication.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, C++, C#, SQL, HTML/CSS, Liquid

Frameworks & Libraries: React, Node.js, Next.js, Flutter, PyTorch, TensorFlow, Pandas, Selenium

Tools & Platforms: Google Cloud, Firebase, AWS, Shopify, WIX, Power BI, JSON

Concepts: Full-Stack Development, Cloud Computing, Machine Learning, Data Analysis, Automation, Version Control (Git), Software Testing, OOP, Responsive UI/UX Design
