EDUCATION

Auburn University

Graduation Spring 2027; Cumulative GPA: 3.71

B.S. in Computer Science & Math | Artificial Intelligence Certificate | Minor in Business Eng Tech (BET)

Relevant Coursework: *AI, Advanced mathematics, Algorithms, Software Modeling/Construction, Fundamentals of Computing I & II, Discrete Structures, Digital Logic Circuits, Assembly Programming...*

EXPERIENCE

Kahua Inc.

May – Aug 2025

Software Developer Intern

- Expanded an automated testing framework by developing 17 new tests and 12 internal functions, improving code coverage and reliability on an Azure-managed codebase.
- Increased team efficiency by ~30%** by engineering a debug tool that enabled hot reloading, eliminating the need to reset the driver during runtime script recompilation.

OCV LLC.

Oct 2025 - Present

Software Product Intern

- Collaborating with engineering and design teams to research user needs and prototype features for a first-responder wellness app, applying human-centered design principles.

Samuel Ginn College of Engineering

Feb 2024 – Sept 2025

Undergraduate Research Assistant

- Fine-tuned open-source computer vision models for medical diagnosis of skin conditions by constructing and managing a specialized image dataset.
- Engineered a full-stack mobile therapy app integrating generative AI to provide users with clinician-approved feedback on journal entries.

BWH Sports Camp

June 2021 - Dec 2024

Founder

- Founded and scaled a sports camp to 60+ campers and 6 counselors, **generating over \$100K** in profit through strategic marketing and networking within the community.
- My responsibilities involved advertising (Instagram and YouTube content), organization (Excel and Forms), counselor training, risk-management (insurance), and day to day operation.

JupJewels.com

July 2025 - Mar 2025

Software Developer (freelance)

- Developed a custom Shopify e-commerce site using Liquid and JSON, implementing a DIY-canvas, dynamic product rendering, automated email workflows, rich search results, and more...

Campus Involvement

- Competitive Programming Team** – Travels each semester to compete in ICPC (UWF winner in 2023)
- Technical Interview Association – Mentor new students & workshop technical skills
- Association for Computing Machinery – Lectures & events with CS department

PROJECTS

Email Bot

SEPT 2024

- Listens on the cloud to reply to FAQ in my BWH Sports camp Gmail inbox. Generates response with an LLM based on a confidence and pre-specified information, then formats and **sends the message to clients**.

Social Platform

AUG 2024

- Messaging and sharing platform that Includes an API library, a live server, and a React app.

TECHNICAL SKILLS

Languages & Frameworks: Python, Java, JavaScript (React, Node.js, Next.js), TypeScript, C++, C#, Ruby, HTML/CSS, SQL, Liquid, Flutter

Libraries: PyTorch, TensorFlow, Pandas, OpenAI API, Selenium, Google Cloud, Firebase, AWS, PowerBI

Other: Shopify, WIX, JSON templating, RStudio, Adobe Premiere Pro, Photoshop, Fusion 360
